WORK EXPERIENCE

GovTech Singapore

Aug 2022 – Present

Applied Research Scientist, Responsible AI | Aug 2024 – Present

Singapore

- Led the research and development of safety testing frameworks for government LLM applications, covering taxonomy and benchmark construction, automated judging methods, and quantitative scoring for chatbots.
- Operationalised research findings into evaluation tools and platform capabilities now used by over 10 agency users across the government.
- Published technical papers formalising frameworks, contributing to broader adoption of safety evaluation standards, with publications accepted as oral spotlight at the ICML 2025 TAIG workshop.

AI Engineer, Video Analytics | Aug 2022 – Jul 2025

- Led end-to-end development of 7+ applied ML systems as the primary engineer, designing bespoke pipelines across diverse use cases such as autonomous robot safety monitoring and contactless vital sign extraction.
- Built and refined solutions across a diverse range of model architectures, including conventional computer vision, transformers-based, and vision-language models.
- Deployed models on the Government Commercial Cloud, including packaging, implementing inference logic, and ensuring stable, secure, real-time performance for downstream users.
- Collaborated with government agencies, research institutions, and industry partners to co-develop ML solutions from initial scoping through final deployment.

SAP

Jan 2021 – Jun 2021

Machine Learning Engineer Intern

Singapore

- Designed and deployed document processing components for HR workflows, automating document classification and quality assessment with 96% precision while enhancing robustness through quality enhancement methods.
- Improved information extraction performance to 92% accuracy by running regression tests, identifying error patterns, and refining NLP classification and extraction models.

EDUCATION

National University of Singapore

May 2022

Bachelor of Science (B.Sc.) in Business Analytics

Singapore

- **Activities and Societies:** ML Tech Lead, NUS FinTech Society; Member, Sheares Hall Media Web

SKILLS, LANGUAGES & INTERESTS

- **Technical Skills:** ML/LLMs; Model Deployment; Cloud Infrastructure; Docker; Full-stack Development
- **Soft Skills:** Problem Solving, Technical Leadership, Cross-functional Collaboration, Stakeholder Management
- **Languages:** English (Native), Mandarin (Native), Korean (Limited Working Proficiency)

HACKATHONS

Champion, Build On, ASEAN 2021 Singapore (Institute)

Jul 2021

- Led a team of 5 to develop a telehealth solution designed for pregnant mothers, delivering a React and AWS web application with integrated machine learning features in 2 weeks.

1st Runner-up, Shopee Ultra Hackathon 2021

Jan 2021

- Competed against 96 teams to build a standalone mobile application prototype within 36 hours, integrating the e-commerce platform's APIs to deliver new engagement-driven user experiences using React Native.
