EXPERIENCE

Government Technology Agency of Singapore, Singapore

Applied Research Scientist, Responsible AI

Aug 2024 – Present

- Spearheaded standardised safety evaluations for public-facing Whole-of-Government LLM applications, shaping a technical framework recognised as an oral spotlight at the ICML 2025 Technical AI Governance workshop.
- Led end-to-end safety and utility evaluations for high-impact public-facing government LLM applications, incorporating multi-turn assessments to surface helpfulness-harmlessness trade-offs.
- Built scalable custom guardrail workflows that enabled teams to customise safeguards across policies and deployment contexts, from synthetic dataset generation to training and evaluation.
- Designed guardrail lifecycle and MLOps workflows to support continuous improvement of production safeguards.
- Partnered with policy, product, and engineering teams to translate LLM evaluation and guardrails into deployable tools, guidance, and platform capabilities adopted by over 80 government agency teams.

AI Engineer, Video Analytics

Aug 2022 – Jul 2025

- Led end-to-end development of 7+ applied ML systems as the primary engineer, designing bespoke pipelines across diverse use cases such as autonomous robot safety monitoring and contactless vital sign extraction.
- Built and refined solutions across a diverse range of model architectures, including conventional computer vision, transformer-based, and vision-language models.
- Maintained production ML inference workflows for the Video Analytics System (VAS) platform and contributed to platform-level QA through Locust-based load testing.
- Collaborated with government agencies, research institutions, and industry partners to co-develop ML solutions from initial scoping through final deployment.

SAP, Singapore

Machine Learning Engineer Intern

Jan 2021 – Jun 2021

- Designed document processing components for HR workflows, improving document classification, quality assessment, and information extraction performance, achieving up to 96% precision and 92% accuracy.

EDUCATION

Georgia Institute of Technology, United States

Master of Science (M.Sc) in Computer Science

Incoming Aug 2026

National University of Singapore, Singapore

Bachelor of Science (B.Sc) in Business Analytics (CAP: 4.57/5)

May 2022

- **Activities and Societies:** ML Tech Lead, NUS FinTech Society; Member, Sheares Hall Media Web

PROFESSIONAL SKILLS

- **Technical Skills:** ML/LLMs; Model Deployment; Cloud Infrastructure; Docker; Full-stack Development
- **Soft Skills:** Problem Solving, Technical Leadership, Cross-functional Collaboration, Stakeholder Management
- **Languages:** English (Native), Mandarin (Native), Korean (Limited Working Proficiency)

AWARDS & ACHIEVEMENTS

Champion, Build On, ASEAN 2021 Singapore (Institute)

Jul 2021

Led a team of 5 to build an ML-enabled React/AWS telehealth app for pregnant mothers in 2 weeks.

1st Runner-up, Shopee Ultra Hackathon 2021

Jan 2021

Placed 2nd among 96 teams by building a React Native mobile prototype integrated with Shopee APIs in 36 hours.
