EXPERIENCE

Government Technology Agency of Singapore, Singapore

Applied Research Scientist, Responsible AI

Aug 2024 – Present

- Led end-to-end safety and utility evaluations for high-impact government LLM chatbots and agentic systems, while spearheading standardised evaluation frameworks for the Whole-of-Government.
- Developed scalable training pipelines for custom guardrail models across policy and deployment contexts.
- Engineered and deployed a full-stack guardrail MLOps application for automated model retraining and deployment.
- Partnered with policy and product teams to shape whole-of-government Responsible AI governance and operationalise it into a platform adopted by 40+ agency teams.
- Mentored junior engineers across projects through technical guidance and design reviews.

AI Engineer, Video Analytics

Aug 2022 – Jul 2025

- Led end-to-end development of 7+ applied ML systems as the primary engineer, designing bespoke pipelines across diverse use cases such as autonomous robot safety monitoring and contactless vital sign extraction.
- Developed ML solutions spanning conventional computer vision, transformer-based, and vision-language architectures across diverse applied use cases.
- Maintained production ML inference workflows for the Video Analytics System (VAS) platform and contributed to platform-level QA through Locust-based load testing.
- Collaborated with government agencies, research institutions, and industry partners to co-develop ML solutions from initial scoping through final deployment.

SAP, Singapore

Machine Learning Engineer Intern

Jan 2021 – Jun 2021

- Designed document processing components for HR workflows, improving document classification, quality assessment, and information extraction performance, achieving up to 96% precision and 92% accuracy.

EDUCATION

National University of Singapore, Singapore

Bachelor of Science (B.Sc) in Business Analytics (CAP: 4.57/5)

May 2022

- **Activities and Societies:** ML Tech Lead, NUS FinTech Society; Member, Sheares Hall Media Web

PROFESSIONAL SKILLS

- **Technical Skills:** LLM Evaluation; AI Safety & Guardrails; Agentic AI; Model Training & Deployment; MLOps; Cloud Infrastructure; Docker; Full-stack Development
- **Core Competencies:** Technical Leadership; Applied Research; Cross-functional Collaboration; Stakeholder Management
- **Languages:** English (Native); Mandarin (Native); Korean (Limited Working Proficiency)
